MOHAMMED ABDULSALAM SHARAFUDDIN

AI & Computer Science Student | Final Year | Multimedia

Email +60184703501 Ayer Keroh LinkedIn GitHub Portfolio

CAREER OBJECTIVE

A driven final-year CS student specializing in Artificial Intelligence at MMU, with a CGPA of 3.52. Passionate about Python, ML, and data-driven solutions. Seeking an internship to apply academic skills in a professional environment and contribute to innovative technology projects.

EDUCATION

B.Sc. Computer Science (AI)

Multimedia University

Expected Graduation: February 2027

CGPA: 3.52 / 4.00

TECHNICAL SKILLS

Python
SQL
C++
Power BI
Cisco Packet Tracer
Git/Git hup
Colab

LANGUAGES

English — Fluent
Arabic — Fluent

LEADERSHIP

Secretary

Arabic Cultural Society, MMU

Public Relations Officer

Arabic Cultural Society, MMU

CERTIFICATIONS

Google Analytics Certification — Google | Dec 2025
HCIA-AI V4.0 Course — Huawei ICT Academy | Mar 2026
Power BI for Beginners — Dec 2025
International Knowledge Exchange on AI — MMU / CICC | Jan 2026
Huawei National ICT Competition — Preliminary — MMU & Huawei | Oct 2025

PROJECTS

Healthcare Predictive Analytics

Python · Scikit-Learn · Pandas · Jupiter | Machine Learning

- Built an end-to-end ML pipeline predicting diabetes onset with a tuned Random Forest Classifier on real patient data.
- Applied SMOTE to resolve class imbalance; evaluated via Accuracy, Precision, Recall, F1-Score, and Confusion Matrix.

Blind Box Battle Arena

C++ · OpenGL · FreeGLUT | Computer Graphics

- Developed a 2-player local multiplayer brawler in C++ with OpenGL, featuring sprite rendering and dynamic arenas.
- Built a custom AABB physics engine with gravity-based movement, HP bars, respawn logic, and win-state tracking.

AeroLogic Flight Management System

C++ · Custom Linked Lists · OOP | Data Structures & Algorithms

- Engineered a console airline system using custom Singly/Doubly Linked Lists, achieving O(1) insertions without standard libraries.
- Implemented flight rostering, passenger manifests, waitlisting, and cancellation with strict heap memory management.

Secure Enterprise Network Design

Cisco Packet Tracer · OSPF · VLANs · ACLs | Data Communications & Networking

- Simulated a fault-tolerant multi-branch enterprise network with VLSM subnetting and VLAN-based departmental isolation.
- Configured OSPF dynamic route and hardened perimeter security with stateful ACLs and firewalls.

Online Course Enrollment System

SQL · MySQL | Database Systems

- Designed a fully normalized (3NF) relational schema managing students, instructors, courses, and enrollments.
- Implemented advanced queries with Joins, Subqueries, Aggregates, and transaction management for data integrity.
